Speech Therapy Screening

Free clinic for children five and under

- Do you or others have trouble understanding your child?
- Does your toddler mix up sounds or leave out syllables? (ex. says “phant” instead of “elephant” or “led” for “red”)
- Is your child using two-word phrases? (ex.: “Me down” instead of “I want to get down.”).

Small delays in speech and language abilities are easier to address at a young age. If you have this type of concern about your child aged five and under, the Wellness Centre offers families with English-speaking children the opportunity to meet with a speech-language pathologist for a free screening session.

IMPORTANT: We strongly suggest that parents concerned about their child’s language development attend our *Is My Child on Track?* workshop prior to requesting a speech therapy screening session. Visit wejh.ca/programs-and-activities/family-matters/is-my-child-on-track/ for details.

When: Spring and Fall annually. Exact dates will be determined based on client demand.

Where: During the pandemic period screening will take place using videoconference.
